Texas Imaging Systems Acquires Peters & Bauer

Waco, TX - Texas Imaging Systems, a leader in the field of office technology around document imaging equipment, has acquired Peters & Bauer, Inc., a long-established document imaging sales and service dealer in Waco. Texas Imaging Systems will continue to sell and support the biggest names in copying/printing/scanning, including Canon, Savin and Sharp.

“Our roots in this industry go back 37 years,” says Randy Davidson, the President of Texas Imaging Systems. “Today’s document imaging technology is amazing in how it can lower operating costs for customers but we are even more passionate around the one thing that has been the cornerstone of our success---an unwavering commitment to customer service, including an unconditional satisfaction guarantee. We call it ‘Putting the Customer in Charge’ and we look forward to bringing that attitude and high level of service to Waco.”

Kenneth R. Peters, a life-long resident of Waco and the driving force of Peters & Bauer for over 25 years, has acquired stock in Texas Imaging Systems and both he and his wife Jennifer will be actively involved in the Waco branch, Kenneth as VP of Waco Operations and Jennifer as Office Administrator. “To further ensure continuity of commitment for customers and the community at large, Travis Fagg will remain as General Manager, Alfred Solano as Sales Manager, and John Roten as Service Manager,” added Mr. Davidson.

“I’m excited to work with Randy Davidson and be part of the Texas Imaging Systems organization,” said Ken Peters. “They bring a ‘Winning Combination’ of tremendous financial strength along with a sincere commitment to local Waco accountability to each customer. No 800 numbers to call, no voicemail---local people, local accountability.”

Texas Imaging has also retained the remaining employees who worked in the Office Technology Division of Peters and Bauer. They will remain in their current location at 2516 West Waco Drive until a brand new 5,000 square foot facility on Woodway Drive is completed in mid-June.

Texas Imaging Systems has branches in Austin, San Antonio, and Lufkin and is opening soon in College Station. Texas Imaging offers new, lower cost document imaging hardware and software solutions for virtually every size business. They can be reached at 881-7500.
